- Limit card use by transaction types (in-store, online, mobile, ATM, etc.)
- Set transaction spend limits
- Select geographic locations where the card can be used
- Set merchant locations
- View recent transactions
- Receive alerts

INTRODUCTION AND REGISTERING

What is SecurLOCK™ Equip?

- It is a simple and secure way to manage and monitor your debit card activity.
- SecurLOCK Equip is a mobile app that allows YOU to control how, when, and where your debit card is used.
- SecurLOCK Equip adds additional protection against fraudulent use of your debit card.
- SecurLOCK Equip provides instant notifications whenever your card is used.

What is required to use it?

- A First Trust Bank debit card.
- An Apple or Android smartphone. After downloading the app, you will be instructed to enter your full account number followed by other authentication information.

How do I get the SecurLOCK Equip app?

- SecurLOCK Equip is available on Apple and Android mobile devices. If you have an iPhone, download the app from the Apple store. If you have an Android phone you are able to download the app from the Google Play store.
- Once the app has successfully downloaded to your mobile device, you must register your debit card.
- Once registered, you can begin using the app immediately.

Is there a fee to use the app?

No. It is provided to you **free** so you have more control over your card.

How many cards can I register?

Unlimited.

What kind of cards can I register?

Your First Trust Bank Debit Card

What kind of mobile devices are supported?

Android – version 4.1 or later and Apple (iOS) – device model 4S, 5, 5C, 5S, 6, or 6 Plus with iOS operating system version 6, 7, or 8 and all future device/release going forward.

What if I am having trouble during registration?

Please use the Contact Us button at the bottom of the landing page and one of First Trust Bank support agents will be more than happy to assist you.

Why do you need my email address?

Your email address is needed in case you forget your password and need to reset it.

Password vs Passcode?

Password - to login to the app, a user will need to enter the credentials (username and password). By logging in with the username and password, the app will create a session ID (20-minutes) where the user can remain idle and still be logged into the app. If the user closes the app and then reopens the app (within the 20-minutes session time), the app will just open. No password will be required.

Passcode - is an additional security setting provided by the app. If a user sets a passcode, each time the user navigates away from the app and comes back, the user will need to enter the passcode.

- The Password and Passcode never expires.
- The Password and Passcode values can be the same.

CONTROLS & ALERTS

Once I register my cards how do I begin managing and monitoring my debit card activity?

You can begin using the service immediately. When turning the card off, the little green button in the top right corner of the card image will turn to red. This means that all transactions (except recurring) will be declined. When ready to make a purchase, a user can turn the card back on instantly.

After you become comfortable with the on/off function, you can start selectively setting controls and alerts by channel (in-store, online, mobile, ATM, etc.). You can also:

- set transaction spend limits,
- select geographic locations where the card can be used,
- set specific merchant categories,
- view recent transaction history,
- receive real-time activity alerts
- and much more.

Can I set a control higher than First Trust's limit?

No, standard limits set by First Trust take precedence over any controls set within SecurLOCK.

What is a real-time alert?

It is an immediate push notification sent to the app. You can select to be alerted on all payment transactions including recurring payments, or you can select just preferred transactions. Preferred alerts are available by spend limits, location, transaction type and merchant category.

By turning my card off am I closing my account?

No. Using card controls does not change the status of your account.

How long does it take for a control or alert setting to take effect?

It happens immediately after you set and save the option.

If I have my card turned off will my recurring transactions go through?

Yes. Merchant recurring transactions will be approved. Additionally, you can select to receive alerts on recurring transactions as well.

Can I use My Location, My Region and International at the same time?

Where My Locations and My Region work independently or together neither can be used in conjunction with International.

I turned my card on and set My Location. I was at the merchant, and my transaction was still declined. Why?

In the app go to Transactions, find the one that was denied and open it, tap the image so it rotates, and the control(s) that were evoked during the authorization will be listed near the bottom. The transaction could also be declined because of external factors like insufficient funds or fraud monitoring.

What are Alert Preferences?

Alert preferences let you know every time a card transaction is attempted. You can be alerted for all, or individually selected transactions. Preferred alerts are also available by location, transaction type, merchant type, and threshold amount.

My alerts are supposed to notify me of every transaction, but I am not receiving them.

Only the primary device will receive alerts. Use the settings menu in the app to set your device as primary.

MANAGING THE APP

Once I get a new, replacement smartphone how do I begin using the service again?

Just download the app to your new smartphone and login with your current user id and password. You can then set your controls and alert preferences.

I received a new card number. Will it be automatically updated in the app?

When a card number changes, the cardholder will need to add the new card to the app. This can be done by going to Manage Account and adding the card. Be sure to “unmanage” the old card.

What if I need help with the app?

There is a “**Help**” function within the app as well as a “**Contact Us**” category where you can send an email to First Trust Bank. If a phone number is listed feel free to call.

How long will my transaction history display?

The last 50 transactions will display in the app for thirty calendar days.

My pending purchase shows it is for more than I paid. Why?

Some merchants send pre-authorizations at higher amounts to test cards' validity. For example, a \$25 gas purchase might display as \$26. Pre-authorizations are common at the pump, for a hotel stay, or for a car rental. Even though the charge is listed in the app for more, it will clear your account for the correct amount.

I only want to manage one of my cards, but they're all being displayed.

To select the card(s) you wish to manage, go to Settings and choose Manage Cards. Then uncheck the card or cards you don't want to manage. Once a card is unmanaged, controls and alerts cannot be set for that card.

How do I access the menu or log out?

Press the icon that has three stacked lines to reach the menu. This icon is usually found in the top right corner.

How do I get more information about the features and functionality of the app?

A “Help” icon can be found at the bottom of the login page and listed in the menu. On specific pages such as the My Location page tapping the “*i*” next to My Regions will open a window with detailed information on how the control works.

What if my smartphone is stolen? How secure is the app?

The app requires a password to access the app. Also, personal information is not stored on the mobile device. The app only displays the last four digits of your card number.

Is Touch ID available on Android phones?

This will be available Fall of 2018.

Would a credit, deposit, or payment ever be denied?

No.
